

Compulsory Task 1

https://github.com/celonicolosi/byb_project

Compulsory Task 2

Since the last capstone project (Task 22) there is no code, and the previous one (Task 5) is too simple, I'm adding to this **Compulsory Task 2** the work that I did in **Task 21**, which is basically a system that will tell you what to watch next based on the word vector similarity of the description of movies.

LICENCES & CERTIFICATIONS

Certified Tester Foundation Level (CTFL) — International Software Testing Qualification Board

Compulsory Task 4

Hyperiondev

Build Your Brand V: Finalising your job search

Please note that if the instructions here differ from the PDF Task instructions, you need to follow these (form) instructions as they will be the most up to date.

If you're self-employed:
Input the contact details of companies and the business contacts of places you are pitching your services or products to. You need to fill in the form on this basis and take screen shots to submit to show that you're seeking new business, in the same way that job seekers need to do with jobs they've applied for.

If you are not self-employed:
Think about the sort of roles you might like to apply for and the sort of companies you might want to work for. Find 5 junior tech roles currently being advertised, ensuring you consider large and small companies as well as tech startups. For each of these, identify the recruiting/hiring managers (possibly the Talent or HR people at each company). Capture the details of each of the 5 roles and contacts in this form. If any of your URLs are greater than 255 characters, shorten them by using bitly.com and paste the shortened version into the form.
