

Compulsory Task 1

Fill in the details of the contact people you have identified on this form. Take screenshots of the form showing all the data you have filled in, and paste them into the Google doc you created at the beginning of this task so that the mentor reviewing your work can see that you have completed this part of the task.

Hyperiondev

Build Your Brand III: Starting your job search

Please note that if the instructions here differ from the PDF task instructions, you need to follow these PDF instructions as they will be the most up to date.

If you're self-employed

Upload the contact details of companies and the business contacts of places you would attach your services or products to.

If you're not self-employed

Think about the sort of roles you might like to apply for and the sort of companies you might want to work for. Use 5 job or technical criteria to create a long list of companies, including you consider large and small companies as well as each category. For each of these, identify the recruiting/hiring managers (usually the Talent or HR people at each company). Gather the details of each of the 5 roles and contacts in this form. If any of your 100 is greater than 255 characters, shorten them by using links.com and paste the shortened version into the form.

There was a problem with your submission.

Feedback on your experience

Let us know a bit about how you're finding the job hunt and the bootstrap.

What search engines, sites, and approaches are working best for you in locating jobs to apply to?

For new LinkedIn, but I'm planning to use a variety of websites to try to find a new job in Data Science area. <https://www.linkedin.com/jobs/view/5167765801?informationChannel=search&refid=20403001>

Do you have any concerns you'd like to share with us? *

Submit

Put a publicly accessible link to your Job/Interview/Pitch Opportunities tracker into your Google doc.

I do not feel confident enough to apply for the roles yet since I didn't do any exercise or coded anything related to Data Science yet, like Data Visualization (Task 16), Working with Datasets (Task 17), Machine Learning (Task 18) and etc. But here my public link for my Job/Interview tracker that I hope will be pretty full in the near future: <https://docs.google.com/spreadsheets/d/1L0Z9pNMQdKzDYHqIXUScvkCncMHJImQGWWtPnA7x0p4/edit?usp=sharing>
